

Intelligent Pen Tray User Manual

QPT200

(Professional Version)

The Best Choice for Your Perfect Presentation!

Information in this manual is subject to change without notice.

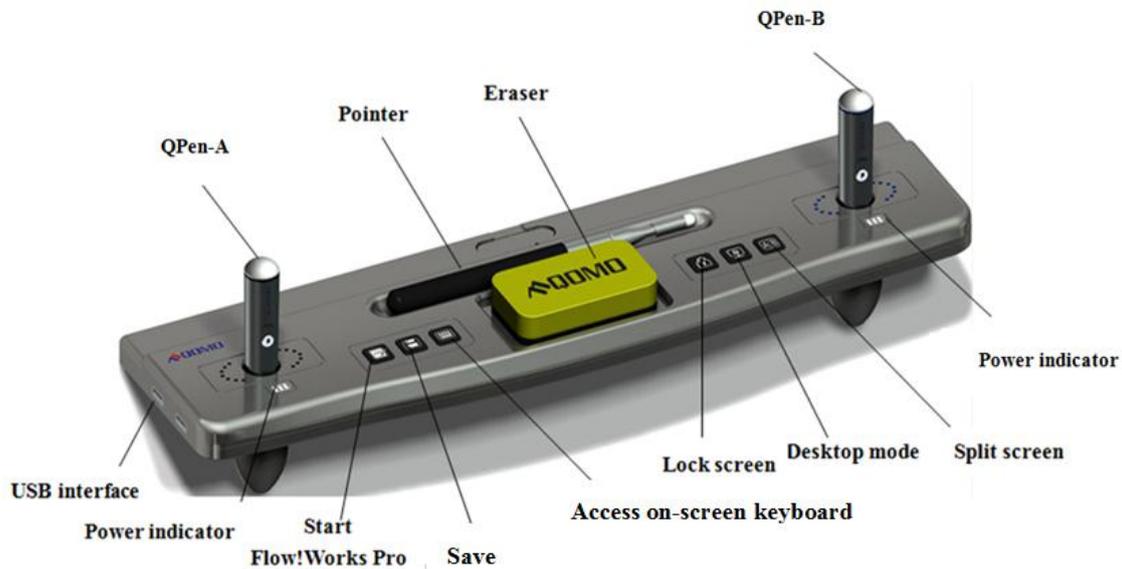

Attentions

- Dropping or knocking the pen tray can cause damage to the inner components.
- Wipe the pen slots with a dry cloth regularly.
- Prevent liquids from contacting the pen tray.
- Keep the pen tray dry. Do not use harsh chemicals, strong detergents or water to clean it.
- Keep the pen tray away from fire and electric shock and avoid long term exposure to direct sunlight.
- Use the pen tray where the ambient temperature is between 0°C and 40°C.
- Store the pen tray where the temperature is between -20°C and 60°C.
- Make sure the pen tray only works in conjunction with QOMO Flow!Works Pro in case of mismatching.
- Don't disassemble the pen tray for repair by yourself. Please contact the technicians if there's any damage.

Intelligent Pen Tray QPT200 Introduction

Intelligent Pen Tray QPT200, a brand-new QOMO product, is easy and convenient to operate in conjunction with QOMO Flow!Works Pro software.

The pen tray comes with 6 physical buttons, 2 multi-functional wireless interactive pens (QPen-A and QPen-B), one eraser, one pointer, two power indicators and three USB interfaces on the bezel. And the two QPens, eraser and pointer are placed in their designated slots on the pen tray. Note that the color of QPen matches that of its holder.

Functions Description

The specific functions are listed in the following table:

<p>QPT200</p>	<p>Multi-functional wireless interactive pens</p>	<p>Multi-functional wireless interactive pens include QPen-A with black color top and QPen-B with blue color top. It can interact with Flow!Works Pro software and PowerPoint. Button functions on QPen can be customized through server . For more</p>
----------------------	--	--

		details about QPen, please refer to the QPen user manual.
	Eraser	Function as an object eraser.
	Pointer	Function as a laser pen.
Physical buttons (Buttons serve as the shortcuts of Flow!Works Pro software and operating system.)		Start Flow!Works Pro software.
		Access on-screen keyboard
		Save files created in Flow!Works Pro.
		Lock your screen so that others cannot access your computer without entering your password.
		Use Flow!Works Pro desktop mode.
		Split the screens on Flow!Works pro interface to allow users to write with different colors on different areas simultaneously.
Power indicators	<ul style="list-style-type: none"> ● If the power indicators light up, the QPT200 is well connected with your device. ● If the power indicators are solid blue, the QPens have enough battery.  <ul style="list-style-type: none"> ● If one of the power indicators is red, the QPen in this corresponding slot is on charge as its battery level is low. 	

		<i>Note that QPT200 supports wireless charging for QPen by simply putting QPen into its corresponding slot.</i>
	USB interfaces	Three USB interfaces on the bezels are used as USB extension ports.
	USB cable	Connect QPT200 with the device through the USB cable. 
	Power cable	Connect the power cable to the device only when both QPens are on charge. In other cases, do not connect the power cable. You don't need this cable if pen tray is connected with interactive touch screen. 

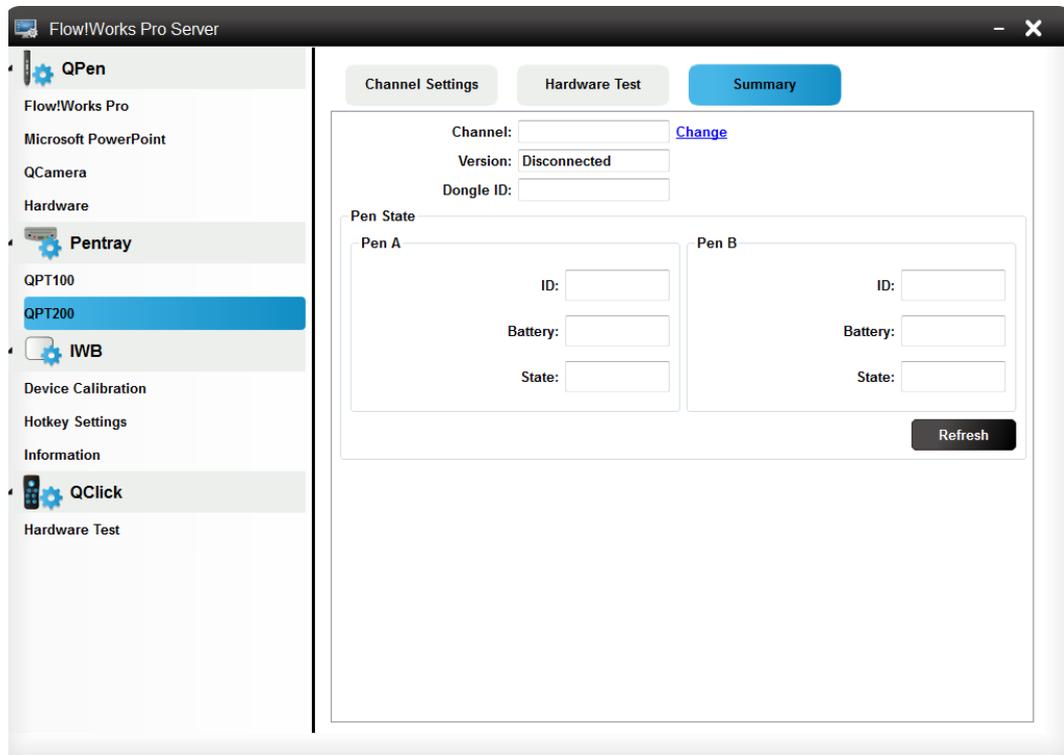

How to Use QPT200

1. Install Flow!Works Pro on the devices that you want to connect your QPT200 with.
2. Connect QPT200 with devices that have been installed with Flow!Works Pro through its USB cable.
3. When QPT200 is successfully connected with the device, power indicators light up.

How to Match QPen with QPT200

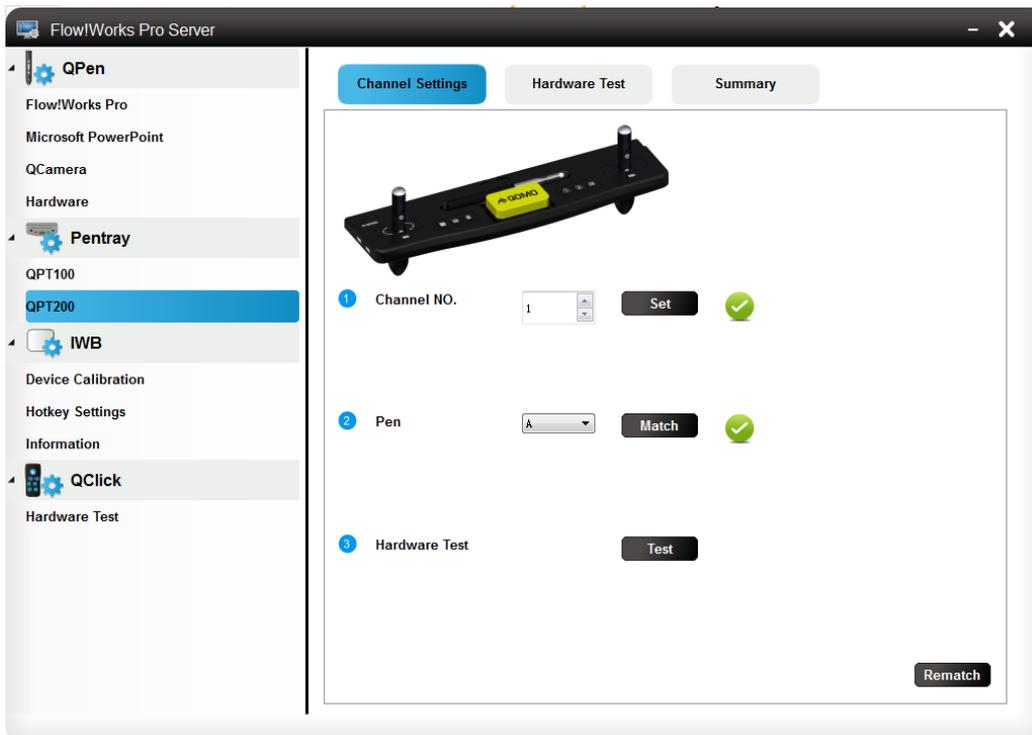

Click Flow!Works Pro Server icon  and a settings interface pops up.

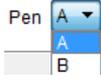

Click QPT200 and its setting interface appears. When QPT200 is connected, its information will automatically be obtained including channel NO., version, dongle ID and QPen state information.

If QPens do not function or QPen state information is blank, you need to match QPens with QPT200 at first. Connect the QPT200 with the device before you match the QPen with QPT200. The following are steps on how to match the QPens.

1. Click [Change](#) and it will automatically jump to QPen channel settings interface.

2. Input channel number or click   button to change the channel number. The valid numbers are from 1 to 16.
3. Click Set button, the light turns green when succeed.
4. Select A or B from the dropdown list  to match QPen-A or QPen-B respectively.
5. Click **Match** button then hold down the up and down buttons on QPen simultaneously. The tick will appear when QPen is successfully matched.
6. Put the QPens into its corresponding slot on the pen tray and they are ready for use.

Note:

- ◆ Click “Test” to jump to the hardware test interface to test if QPen can be used after match.
- ◆ You don’t need to connect QPen its own receiver with the device when it is successfully matched with QPT200.

Specification

Model	QPT200
Working Voltage	5 V
Working Current	200mA--500mA
Power Supply	USB cable
RF Transmit Power	-40~8dbm
RF Received Power	-89dbm
Communication Distance	10m
Frequency Range	2.40 GHz - 2.48 GHz
Working Temperature	-20°C~+60°C
Storage Temperature	-20°C~+60°C
Dimensions	502*138*85 mm
Charging Current	Every single slot: 100mA
Charging Voltage	Every single slot: 5V
Interactive Software	Flow!Works Pro
QPen Charging	Wireless charging
Accessories	Intelligent Qpen*2, eraser*1, pointer*1
